# TIPA Solar and Proxables Announce Exclusive Partnership for BENELUX Market

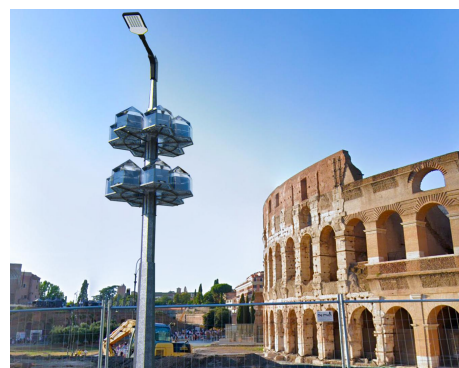

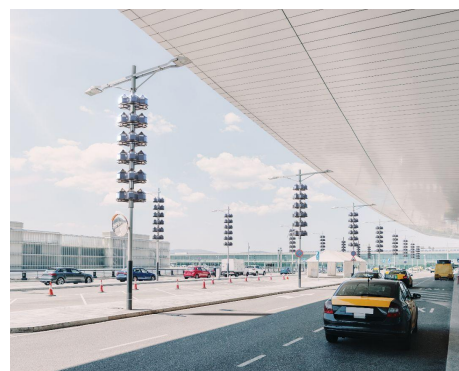

TIPA Solar, a pioneering solar technology company, has entered into an exclusive distribution agreement with Proxables, a leading renewable energy solutions provider, granting Proxables exclusive rights to market and distribute TIPA Solar's cutting-edge solar energy solutions across Belgium, the Netherlands, and Luxembourg (BENELUX).

This strategic partnership aligns with both companies' shared vision of accelerating the transition to renewable energy and decentralized power solutions. TIPA Solar's proprietary solar technology, which offers significantly higher energy generation efficiency than traditional flat-panel solar solutions, will now be made widely available to commercial, industrial, and municipal customers throughout the BENELUX region through Proxables' established network.

**"We are thrilled to partner with Proxables, a company that shares our commitment to innovation and sustainability,"** said [Nik Vyas], CEO of TIPA Solar. **"This agreement marks a major milestone in our European expansion, enabling businesses and municipalities in BENELUX to benefit from our advanced solar technology."**

Proxables, known for its expertise in renewable energy deployment and smart infrastructure solutions, sees TIPA Solar as a game-changer in the industry. **"Our exclusive partnership with TIPA Solar is a significant step in bringing next-generation solar technology to BENELUX,"** Gabor of Proxables. **"With the region's strong commitment to sustainability, we are confident that TIPA's innovative solutions will drive the adoption of clean energy at scale."**

This partnership comes at a time when the BENELUX region is ramping up its efforts to reduce carbon emissions and achieve energy independence. By combining TIPA Solar's breakthrough solar technology with Proxables' extensive market expertise, both companies aim to support the region's ambitious renewable energy goals.
